

PREAMP SPECIFICATION

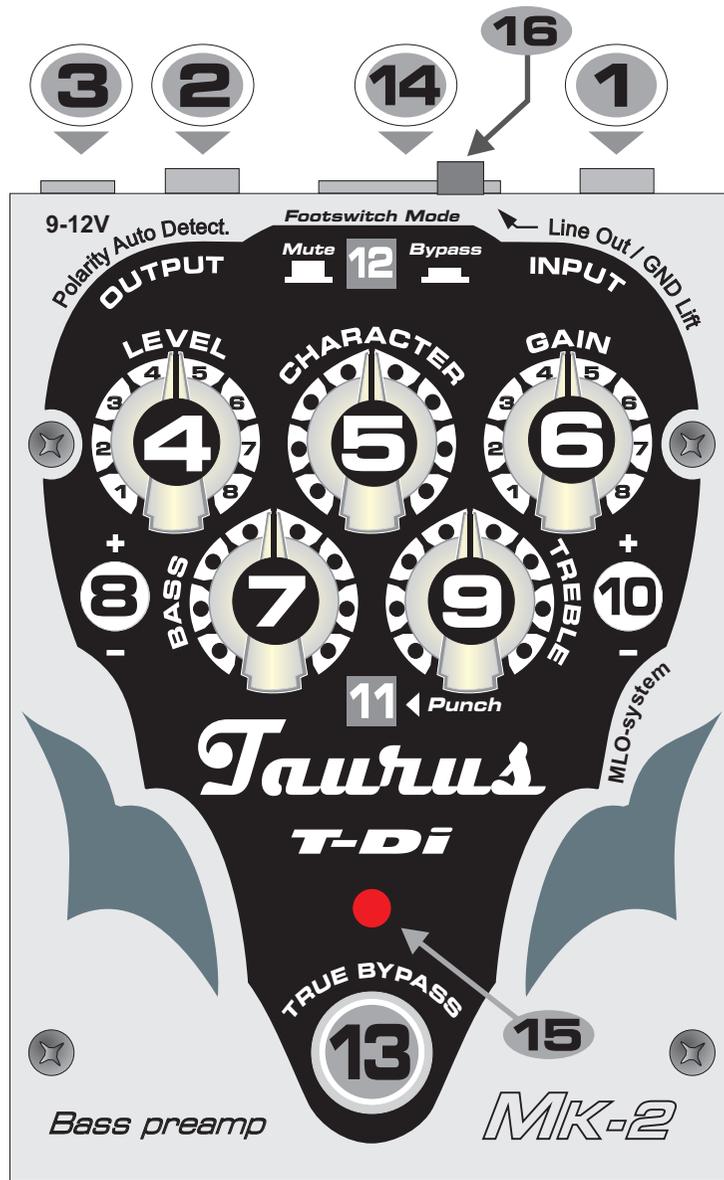

Dear Friends,

We proudly introduce our new boutique line of products, the Taurus Silver Line of bass pedal effects, which shares all Taurus's DNA and is designed to satisfy even the most demanding musicians. Our Silver Line includes four heavy duty stomp boxes labeled Abigar (Multi-Drive), Zebu (Reverb-Delay), Vechoor (Multi Chorus-Flanger) and Tux (Compressor-Limiter). Individually engineered with the specific objective of giving you unprecedented control over the sound. It has been said that "Passion drives you to fulfill your dreams". Our founder, head of the corporate research and development, sound and electronic engineer and most of all musician, is spreading his passion and dedication on all of us. Box Electronics, makers of Taurus is fulfilling its dreams and wants to give you the tools to fulfill yours. Our passion supported by the latest technology, best electronic components, hand crafted manufacturing and quality control process guarantees superior quality and complete satisfaction. For the past 27 years, our philosophy remains to provide you with the upmost professional service and the best musical gear. Try our Taurus products, you won't be disappointed. We welcome you to our web site which has received a major face lift and has been extended to include more in depth technical product information, links to users, applications, silver line reviews, testimonials and much more.

Taurus T-Di Mk2 is a foot pedal preamp, what can be an alternative solution to amplifier for solid and powerful bass sound. It can also be used as a booster for your amplifier. You can connect it directly to mixing console on stage in recording studio or HiFi equipment. You can use it as typical Di-box or plug into your arsenal of pedal effects. MLO System means unique and comfortable sound colour creation. It's very easy and intuitive using only two bass and treble knobs. MLO gives you new possibilities - it provides optimal mid frequencies proportion, depending on position of bass and treble knobs. This method assists musician's intentions in logical and effective way while tone is regulated. Additionally the MLO-system results in same level volume output no matter how the low frequency control knob is positioned. Musician can clearly feel only tone changes of the instrument, not its amplifying, like it takes place in standard solutions.

Features:

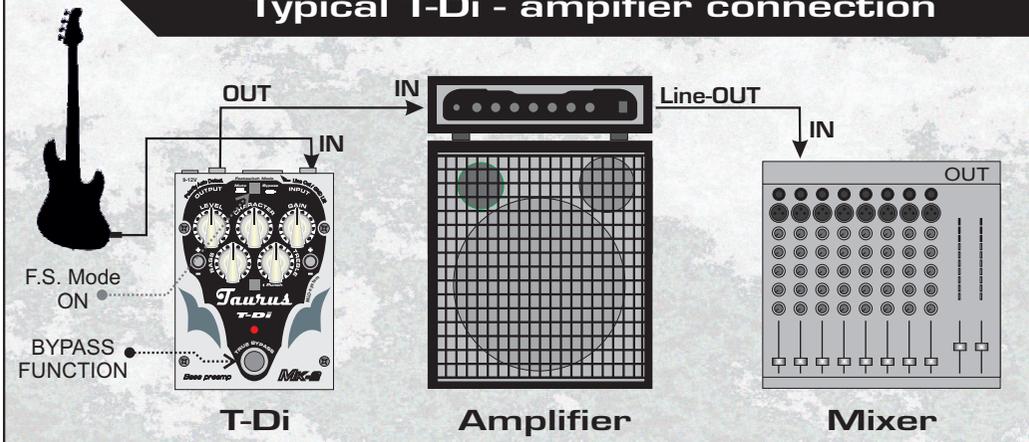

1. **INPUT** - mono 1/4" (jack)
2. **OUTPUT** - mono 1/4" (jack)
3. **POWER SUPPLY INPUT** - DC 9-12V Polarity supply auto detection/ connector dimensions 5,5x2,1mm.
DC ASSISTANT - protects from loss of signal. Effect switches automatically to the "bypass mode" in case of disconnection or low voltage of DC supply (<6V).
Warning! Only stabilised power supply >100mA must be used
4. **LEVEL**- knob controls overall effect volume
5. **CHARACTER** "Blend knob" between "Vintage" & "Modern" sound.
6. **GAIN** - input gain preamp adjustment.
7. **BASS** - low frequency level control with MLO system.
8. **Triple BASS-switch** to reduce or boost low frequency CUT/OFF/BOOST
9. **TREBLE** - high frequency level control with MLO system.
10. **Triple TREBLE-switch** to reduce or boost high frequency CUT/OFF/PRESENCE
11. **PUNCH** - midrange effectiveness switch.
12. **Footswitch Mode** - bypass/mute footswitch mode selector
 - footswitch mode "Mute" - mutes signal at the output. Useful when works as a Di-box connected to mixer.
 - footswitch mode „Bypass"- switches between ON and BYPASS. Useful when works as a effect connected to amplifier.
13. **Footswitch**. If it's turned off true-bypass is active.
14. **OUTPUT** - XLR - mixing console connection (balanced)
15. **Effect „ON" indicator**
16. **Ground lift switch**.

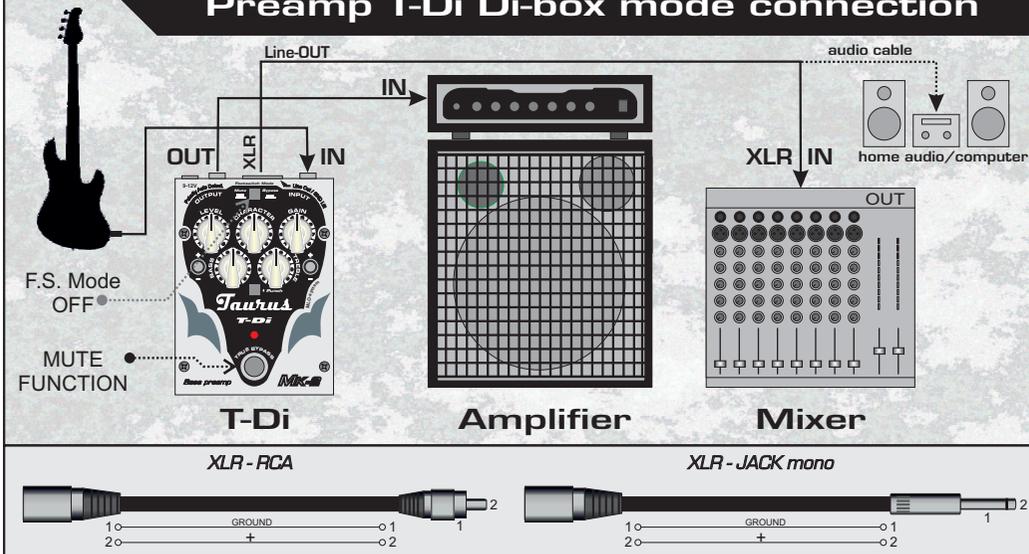

Thank you for your trust and for choosing Taurus Tdi
