Guitar Engine

Custom Guitar Drive

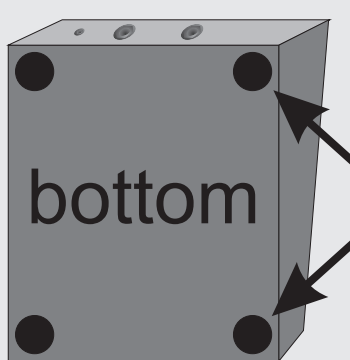

Vintage

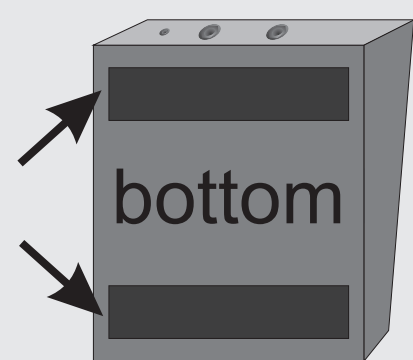

Classic

HIGH GAIN

Designed by musicians for musicians

Rubber leg caps and velcro are included in the package to secure your effect to the pedal board.

CONGRATULATIONS ON THE PURCHASE OF YOUR NEW TAURUS PEDAL

Thank you for your trust and for selecting Taurus effects pedal.

Taurus is made by musicians for musicians. It's been our philosophy to provide you with the best possible quality, fully professional, superior musical equipment.

While designing this device we've taken in consideration that it requires more than just selecting the correct parameters, best components and hand crafting to achieve the perfect balance between technology and sound.

Our very close collaboration with musicians has helped us to design and manufacture high quality equipment which will exceed your expectations and needs.

We at Taurus, extend our gratitude and wish you great musical experience, sonic adventures and explorations with our gear which will become your faithful companion!

The Guitar Engine is a unique DRIVE which reacts to overdrive sound in a very similar way to classic tube amplifiers. Maintaining sufficient dynamics and equipment response to the articulation of sound are the most significant features of the Guitar Engine. They enhance the "feeling of sound" for the guitarists and support them while playing.

UNIQUE FEATURES:

Polarity Auto Detection – allows using supplies with center-positive and center-negative polarity

VOLTAGE RANGE 9-15V

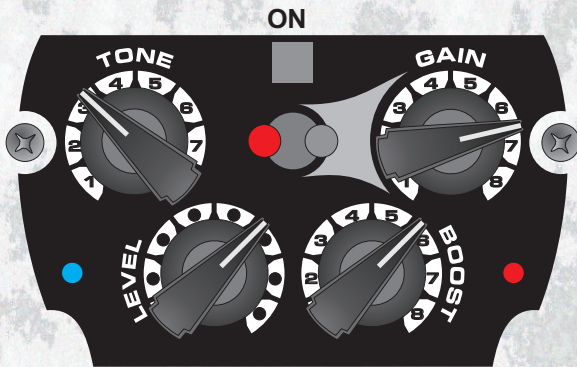

DC Assistant - protects from loss of signal. Effect switches automatically to the "bypass mode" in case of disconnection or low voltage of DC supply (<6V).

EFFECT SPECIFICATION

1. INPUT - mono 1/4" (jack) > impedance: 1M ohm
2. OUTPUT - mono 1/4" (jack) > impedance: 1K ohm
3. POWER SUPPLY INPUT - DC 9-15V/polarity supply auto detection/ connector dimensions 5,5x2,1mm.
Warning! Only stabilised power supply >100mA must be used
4. **TONE** - shapes the overall tonal response of the pedal from warm and smooth to bright and cutting.
5. **CHARACTER** - balance and mix between VINTAGE and MODERN sound
6. **GAIN** - knob controls the amount of overdrive
7. **LEVEL** - overall effect volume
8. **BOOST** - volume level adjustment, activated by BOOST foot switch
9. **PRESENCE** - switch
10. **DRIVE FOOT SWITCH** - true-bypass when on the "Off" position
11. **BOOST FOOT SWITCH**
12. **DRIVE „ON” indicator**
13. **BOOST „ON” indicator**

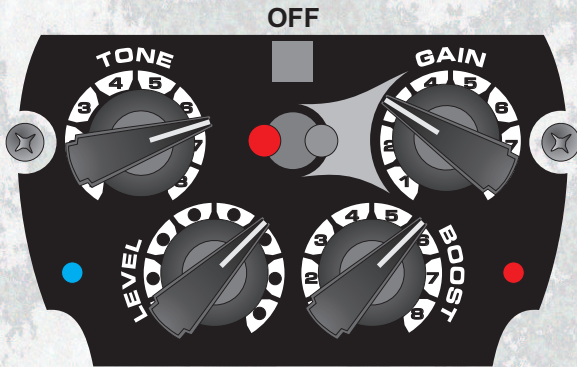

Dimensions: (H x W x D) 65 x 96 x 144mm

EXAMPLES OF SETTINGS

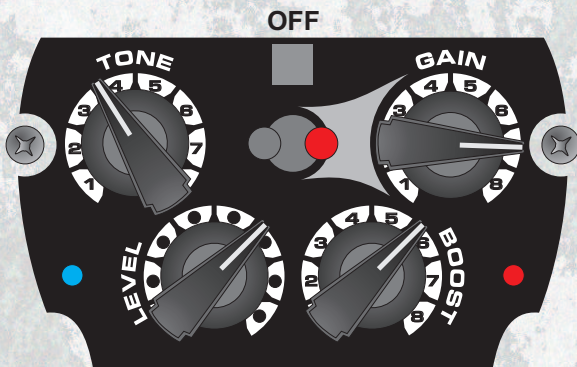

1

Classic sound with large dynamic DRIVE. Perfect for playing chords

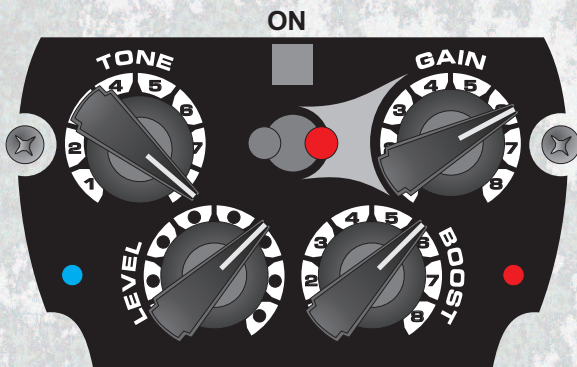

2

Crunch sound with great dynamic threshold.

3

Great gain and compression for playing riffs and solos

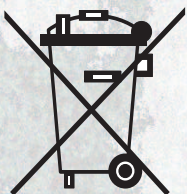

4

Extremely saturated sound for playing heavy power chords.
